# ADA In 3D

'ADA In 3D' available on the Apple App Store and the Android Market

A fully visual and interactive version of the ADA Standards now available for iOS and Android devices

ADA in 3D is an illustrated and interactive version of the 2010 Americans with Disabilities (ADA) Standards for Accessible Design. The 2010 standards became enforceable by the Department of Justice in 2012. Now you can see the standards in 3D pictures and models.

-Over 320 easy to read images
-Over 100 interactive 3D models
-8 quizzes to test your knowledge
-Links to the ADA website and hotline
-Map feature to find ADA Centers near you
-Links to other resources

Because of the number of images and interactive models, content is only accessible with an internet connection. This was done to keep the app size from being huge! WiFi connection is recommended when viewing the interactive models.

*ADA 3D is meant to be used only as a guideline to the 2010 ADA Standards for Accessible Design. Always refer to the written standards.

$3.99 on both iTunes and Google Play. Requirements: iOS 5.0 or later - Android 2.2 and up.

Please visit www.UniversalDesignStyle.com/ada-in-3d/ for more information.

Wyatt Tuell (Developer) designs home modifications for people with a disability for a non-profit and   runs the Universal Design Style blog. He is a certified interior designer with a degree in Interior Architecture.
